Career Objective

A versatile full-stack developer with 4+ years of experience, specializing in Laravel and Next.js while also capable of working across multiple technologies and frameworks. A fast learner with hands-on experience in Node.js ecosystems such as NestJS, Express.js, and other modern tools. Focused on understanding core concepts and system design to build scalable and efficient applications. Seeking an opportunity to contribute as a multi-stack developer while continuously growing in a dynamic and challenging environment.

Experience

Softivus (In-house)

Aug 2024 – Present

Software Engineer

Uttara, Dhaka, Bangladesh

- Built and led a development team to deliver multiple projects simultaneously for both CodeCanyon and international clients, while also managing DevOps responsibilities including deployment, scaling, and server optimization for reliable production performance.
- Designed and implemented a versatile, reusable dashboard for CodeCanyon projects, significantly accelerating project development timelines and ensuring consistency across multiple projects.
- Successfully managed and delivered multiple projects for CodeCanyon and international clients, ensuring high-quality deliverables within strict deadlines.
- Implemented and configured multiple payment gateways with support for various currencies, enhancing the flexibility and global reach of the applications.
- Built a robust and dynamic notification system capable of delivering alerts via Email, SMS, and Firebase. Designed an admin-friendly interface to allow customization of email templates, improving user engagement and communication efficiency.
- Build more then four mobile app for cross platform using React Native and Expo.

Arrowhead It Solution (Remote - Part Time)

Sep 2023 – Apr 2025

Full Stack Developer

Khulna, Bangladesh

- Designed and integrated microservices architecture for ERP application, significantly enhancing scalability and maintainability.
- Developed and maintained robust APIs using Laravel, ensuring seamless integration with front-end (Next.js, Vue.js).
- Implemented performance optimization strategies, resulting in a 60% improvement in application response times.
- Utilized modern development tools and practices such as Git, and CI/CD pipelines to streamline development workflows.

Ilegcy (Remote)

Nov 2021 – Aug 2023

Backend Developer

Kuala Lumpur, Malaysia

- Collaborated with the team to design and implement efficient database structures using MySQL and Postgresql, optimizing application performance for Courier management and Lead management Application.
- Integrated third-party APIs and services to extend application functionalities and improve user experience.
- Ensure that every query optimized and fast, I'm using various tools and package such as DB Indexing, Cache server as Redis, Query monitoring system as laravel-debugbar or telescope.
- Actively participated in code reviews, providing constructive feedback and adhering to best coding practices to ensure code quality and consistency.

Projects

Quiz Platform | Laravel, Next.js, Firebase, MySQL, React Native

[Item Link](#) [Mobile Link](#)

- Developed a full-featured gamified quiz platform to design, manage, and monetize quizzes with Adsense (Google, Adstera and custom)
- Implemented Contest, leaderboard ranking, and AI-powered question generation to maximize engagement and interactivity.

- Enable AI feature that allow admin to make multiple questions without any hassle also can translate to any language using AI.
- Integrated Firebase for push notification for Web and Mobile. Also use coin as virtual currency and coin buy system with multiple payment gateway.
- Optimized and published the project for CodeCanyon, production-ready standards.

Yacht/Boat Rent and Selling Platform | *Laravel, Firebase, Mysql*

[Item Link](#)

- Build multivendor platform for yacht/boat Rent and sell
- Developed a full-featured multivendor platform for yacht and boat rental and sales, allowing vendors to list, manage, and monetize their fleet with multiple payment gateways.
- Built a reusable admin dashboard with integrated automated notification system (email/SMS) and template editor for managing dynamic content efficiently.
- Integrated Mapbox to provide an immersive 3D location navigation system, enhancing the user experience for browsing boat locations and routes.
- Designed and optimized the platform specifically for CodeCanyon, and the project was accepted on the first attempt – showcasing its quality and market readiness.

Property Management Platform | *Laravel, Node.js, Next.js, Tailwindcss, Mysql, Docusign*

[Live Link](#)

- Developed a comprehensive property management platform for Comvst, supporting property rent, sale, investment, and auction modules.
- Implemented multi-role system functionality for users, property owners, agents/property managers, service providers, and admins with role-based access and workflows.
- Built and maintained core property modules including property listings, rental management, sales flow, investment opportunities, and auction-based property bidding.
- Integrated marketplace and handyman service solutions, enabling providers to offer services and users/property owners to request property-related support.
- Developed complex business logic for property ownership, agent management, provider services, user activities, and admin-controlled platform operations.
- Built dynamic and interactive user interfaces with Next.js, improving usability across property browsing, management, service booking, and auction participation.
- Collaborated closely with stakeholders to gather requirements, provide progress updates, and align platform features with business goals.

Technical Skills

Languages: PHP, JavaScript, TypeScript, JQuery, Alpin.js,

Technologies: React.js, React Native, Vue.js, Laravel, Laravel Filament, Express.js, jQuery, Bootstrap, Node.js, Tailwindcss, Prisma, Nest.js, Next.js, Drizzle

Concepts: Compiler, Operating system, Virtual Memory, Cache Memory, Encryption, Decryption, API, Database Normalization, Agile Methodology

Additional: Linux-Ubuntu, CI/CD, SonarQube, RabbitMQ, well-known Django, Laravel Octane, Cloudflare, Good knowledge of using AWS and Laravel Vapor, Oracle with Mysql Heatwave, Digital Ocean and Client handling.

Education

Green University Of Bangladesh

Bachelor of Science in Computer Science

May 2022

Dhaka, Dhaka

Brahmanbaria Polytechnic Institute

Computer Technology

Fab 2018

Islampur, Brahmanbaria

Achievements

- **Best Project** - Received the Best Project Award for developing a Bangla Assignment Plagiarism Checker (Tack Stacks - Django, OCR and NLTK etc) (University Final Year).

Language

- **Bangla** - Native proficiency in speaking, reading, and writing.
- **English** - Conversational in speaking, reading, and writing.
